HONOLULU IRON WORKS CO From the San Francisco papers we learn that the volcano of Mount Hood in Washington Territory is again in an active stet, immence volumes of smoke beginning to ascend from it on the night of November 3d. This was just two days before the commencement of the present cruption of Mauna Loa. Is there a sympathy existing between them, as there is between Mt. Hecla in Iceland and Mt. Etna in Sicily. This little apparatus oils the cylinder constantly and perfectly. So little oil is used that a saving of oil and year equal to four times its cost may be effected in one Pint Size, \$43. Half Pint Size, \$30. VOLCANO HOUSE

CRATER OF OF KILAUEA. W. H. LENTZ, MANAGER. We were delighted to see on Tuesday the number of Hawaiian women who ride in the graceful pa-u. The bright-colored flowing drapery, the cornely black capes, the mails lei for the neck, and the brilliant flower leis for the head, make an appearance so infinitely superiour to the unsuitable holuku, and the trumpery hat and artificial flowers that we heartily wish that there were some recognized leaders of fashion amongst the wahines who could by example and precept re-establish the pa-u. Plenty to eat, a ronsing fire, clean beds, and the best attendance on the Hawaiian Islands.
Visitors requiring any unusual display of volcanic action will kindly give Manager at least ten days notice in fine weather, and from cleven to thirteen in foul.

5 17 SALMONI

There has been considerable comment on the unusually large number of intexicated natives seen in town on Taesday afternoon. Notwithstanding the strict legislative ensetments and the heavy penalty for selling liquor to natives, there are those apparently who will take the risk of supplying them with it. It seems to us that if the police force would exert the same vigilance in watching these offenders, that the latter do in evading the police, the business would soon be discontinued. 100 bbls. Tuesday the 16th inst., the birthday of His Majesty the King passed off quietly and pleasantly. Most of the business houses were closed after noon and flags were flying from many buildings, and the town presented a holiday appearance. Flags were displayed by most of the vessels in the harbor, but the Lacroskirs Witch which was decked with flags from stem to stem was the only vessel that made any great display of bunting. The regains, boat race and horse race all came off as at first announced and nothing occurred to mar the pleasures of the day.

The next stop was made opposite the residence of Queen Emma where three more cheers were given and the band again played the National Anthem. The procession then passing down Nauanu Street turned on to King and from King back to Fort, up which they marched to the engine house. The universal expression in re-gard to the procession is one of approval, and all anite in saying that it excelled any previous dem-onstration of the kind ever attempted in Hono-lulu.

Tuesday's sport at Kapiolani park was of a varied and interesting character and was enjoyed by a large concourse of people. The trotting race between the gray stallion King William, and the bay mare Dolly Varden, was called at 2:30 p. m. The horses got off to a fair start, but King William soon gained a lead of three or four lengths which the little mare was unable towrestle from him and he came in winner by six or seven lengths, making the time in 3:10. The second heat was also lead by King William, time 3:12, thus winning two heats and the purse of \$200. There was a trial of heats and the purse of \$200. There was a trial of lead by King William, time 3:12, thus winning two heats and the purse of \$200. There was a trial of speed also between Black Prince, and Dark Horse, which resulted in an easy victory for Dark Horse, which resulted in an easy victory for Dark Horse, and foot races. A second trial of speed was agreed upon between Black Prince, and Dark Horse, and in turning round to get ready to score again, one wheel of the Prince's sulky got into quick-sand and upset, throwing out the driver; he then started without the word and on a dead run, and before he got to the quarter pole he cleared himself of he got to the quarter pole he cleared himself of the sulky. The ends of the shafts were hanging to the traces and at every jump they came down on -his hind legs, which of course kept urging him on and he came in under the wire in fine style, where he was stopped by the crowd. The Judges, how-ever, declared him distanced for coming in with-out his weight.

The boat race on Tuesday afternoon was between free six-oared boats, the A, the Kanoelani and the fale. The start was made about 4 o'clock the rews pulling with coxwains. The A lead the way to the spar buoy, the turning point, but on the home stretch the Kanociani, which had held the second place from the start shot ahead and came in first. The Male also passed the A, whose crew exerted themselves too much on the start, and claimed the second place. The contest was interesting and exciting.

Just here let us turn back and see the reasons why the King had no confidence in the Wilder Ministry. In their conduct of the Government it is not difficult to see the reason of their being dismissed. The members of this Cabinet showed by their reports to the Legislature they were divided and their conduct of the Government was wrong. In the biennial report of the previous period, of the Minister of Finance, can be seen the wrong and arrogance of the Minister of Interior as regards the other members of the Cabinet, and, said the Minister of Finance, (8. K. K.)., when that little haole saw that his opinion, to report independently to the Legislature, did not conform to the law, only then did he apologize and unite his report with mine—proud little haole indeed is this! These words were repeatedly heard by the Honorables of the last Legislature. We will not speak at length concerning the time the Honse was in session, inasmuch as the record of the deeds of the Ministry was made in the House. In matters of great importance and in little things their opposition to each other was always apparent. On the appropriation pertaining to the Royal Household the little haoles ran out, as also they did on some other items; the Minister of Finance voted in favor of the Bill to parait the importation of opium into this place, and his colleagues were opposed to it, so also with regard to the China Steamship Line, notwithstanding it was won by one man; and at times the House turned in favor of the Minister of Foreign Affairs. Thus did the Ministry act as in mockery in the face of the people until the time when the Legislature adjourned. Smith of the nobles, said to one of his fellow-nobles; "I am ashamed of this Ministry; it was never so with former Cabinets of this Giovernment." Captain D. L. Kaaina of the schooner Parchiferoris having seen a sub-marine eruption about five miles off shore from Honokaa, on the northest coast of Hawsii, at 4 p. m. on Wednesday, the 17th inst. He says he first noticed a column of water and flame srike from the sea about a quarter of a mile ahead of the schooner and that he became frightened and kept further off shore. The outburst lasted only about two minutes, After putting the schooner about, a dense volume of smoke was arising from the place, but he was unable to see any agriculation of the water, and observed no more water or flame thrown up.

Tuesday the 16th inst., the birthday of His Majesty the King passed off quietly and pleasantly. Most of the business houses were closed after neon and flags were displayed by most of the vessels in the harbor, bor, but the Lanarshire Witch which was decked with flags from stem to stern was the only vessel that made any great display of bunting. The regults, boat face and horse race all came off as at that he sees acquainted with Garfield and Fester. But that letter has been seen by no one of whom

In the newspapers opposed to the real Hawaiians, the Hawaiian Ministry was blamed without proper explanation of what they had done. If we understand the nature of Foreign officials, it is very clear they have done things for which their Governments will censure them. Those officials were placed here to exact the rights of their stitues.

November 10th.—Got up at 3-30 A.M. to see
it. It has extended much farther. The line on the left is now plain and some think the lava may come near this place. Mr. Severance who was at Waimea came home in haste, thinking Hilo in danger, but the people are but lit-tle alarmed. Mr. S. has sent Mr. Cohen, a constable, with a guide to see how far the lava has travelled. It looks like a grand torchlight procession only much more grand. Many were curious to know how Kilauea is affected. We had a report that there was no signs of are quite active.

November 11th .- The flow has nearly stopped at the right. It can only be seen from here about 6 miles. It has travelled 30 miles. The flow at the left is increasing and is going towards Kau, having travelled—as near as we can judge—about 10 miles. The sight was ex-traordinarily grand last night. Parties that returned from Kilauea last evening report it quite active. Mr. Cohen and the guide return-When the Cabinet went out immediately after the adjournment of the Legislature of 1880 it pleased the King to appoint Messrs. Moreno, Bush. Walker and Davidson to a new Cabinet. In the evening of that day the members of the new Cabinet met and severally accepted the office to which the King had appointed them, with thanks to the King for the great honor he had conferred upon them.

November 12th.—The lava stream to the left Kau. A letter was received last evening from a resident of this place now visiting Kau. It could be seen but a short time last evening as it was raining. The flow towards Mauna Kea is much smaller and seems to decrease.

Under date of Nov. 12th, as we learn by a The sight on Saturday was indescriblably grand. All day, with or without the glass, our eyes were turned towards the mountain. A fountain of liquid lava was pouring up from the summit line of Mauna Loa. Two fiery streams were distinctly visible, coursing down its side, one towards Mauna Kes, the other nearer Hilo. At night the sky was a glare of light that made objects distinctly visible in the streets and in our rooms. Wednesday night the sight of the mountain was most glorious. The broken clouds lying around the summit sides were irradiated and shone in wonderful splendor. The force of eruption seems now diminishing.
